

Sales Trends & Operational Waste Analysis

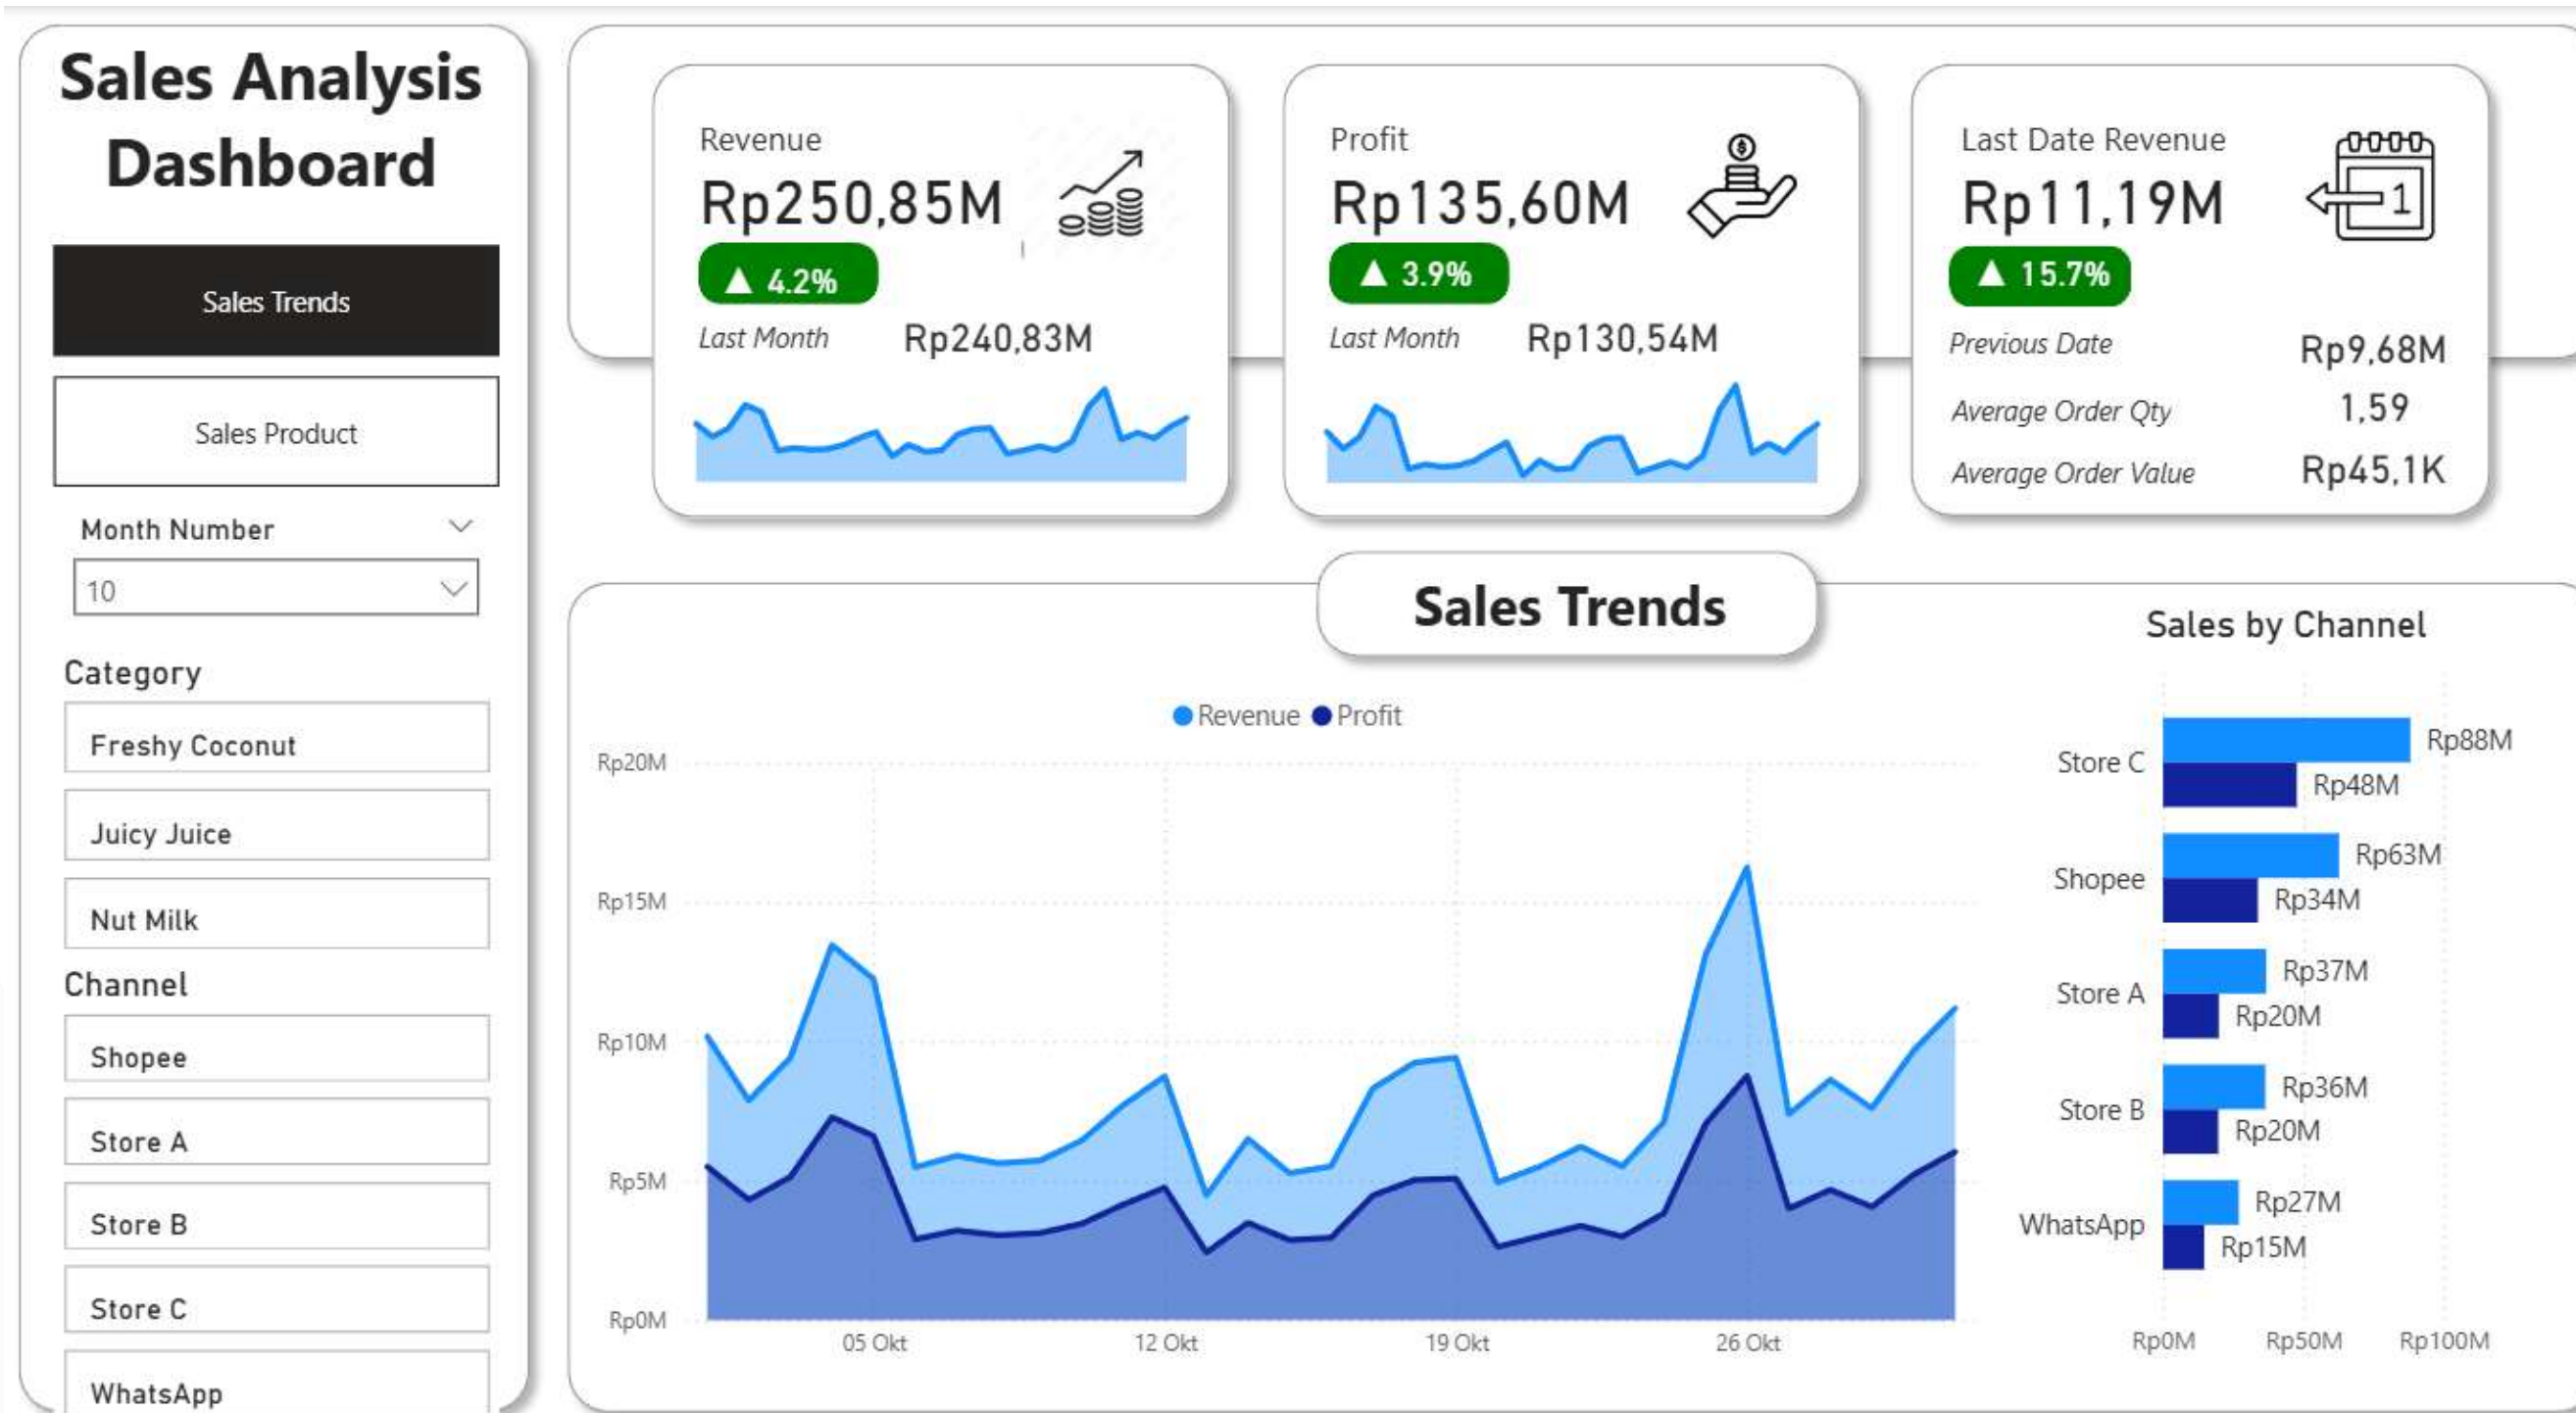

ID Juicer is a health-focused retail company specializing in the sale of **sugar-free, fresh-from-the-source beverages**. We offer a diverse selection of premium healthy drinks, including cold-pressed juices, natural coconut water, and artisanal nut milk. Our mission is to seamlessly provide consumers with delicious, convenient products that support and promote a **healthy lifestyle**.

Bringing the **ID Juicer** vision to life, our dashboard transforms daily performance into a financial narrative. We track the flow of revenue and profit alongside critical waste metrics, offering a detailed breakdown by product, category, and channel to ensure every part of the business is optimized.

Analysis Dashboard

The KPI card displays Revenue, Profit, and Last Date Revenue compared to their previous periods. To visualize performance, **the trend bar is color-coded**, it appears **green with an upward arrow** for positive growth and **red with a downward arrow** to indicate a decrease.

Analysis Dashboard

This section features a line chart tracking **daily sales volume** for the current month. It is paired with a bar chart that **breaks down revenue and profit by channel**, providing a clear comparison of performance sources.

Analysis Dashboard

The following KPI card tracks **waste costs** relative to the previous month, with **waste quantity** included for additional detail. Three additional cards monitor **revenue progress** across all categories; a **green marker** appears once a category **exceeds its target**.

Analysis Dashboard

This triple bar chart displays revenue alongside waste metrics per product to highlight **operational trends**. It confirms that waste costs generally **scale with revenue growth**. By analyzing this chart, we can pinpoint which items are the **primary drivers** of both total revenue and waste volume.

Analysis Dashboard

To enhance **interactivity**, I have included **slicers** for Month, Product Category, and Sales Channel, allowing users to **filter the data** as needed. Additionally, **navigation buttons** have been integrated to provide a seamless transition between selected pages.

Summary

Performance Overview

- The dashboard features **KPI cards** for Revenue, Profit, and Daily Revenue. Most metrics compare this month to last month, while Daily Revenue compares today to yesterday. **Green and red indicators** clearly show if the trends are moving up or down.

Waste & Target Tracking

- I included a section to track **waste cost and quantity** to see how much we are losing. There are also three cards for **category revenue** that turn green whenever we hit or exceed our targets.

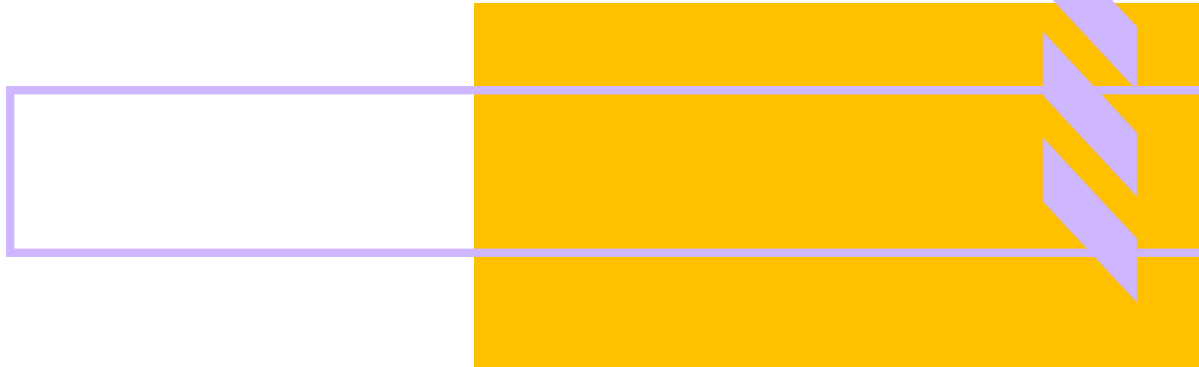

Sales Trends & Channels

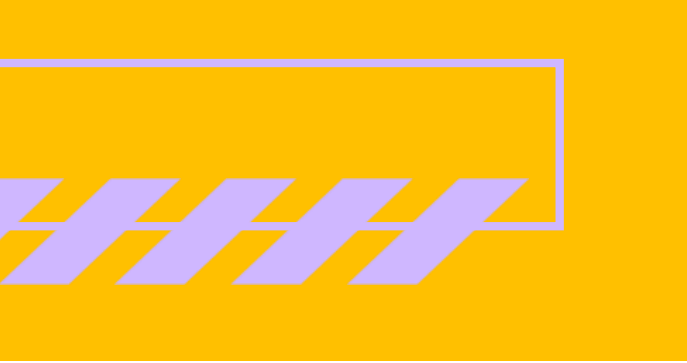

- **Line Chart:** Shows daily sales trends throughout the month.
- **Bar Chart:** Shows how revenue and profit are divided across different sales channels.

Product Analysis

- A **triple bar chart** compares revenue and waste for each product. It shows a **clear link**, when revenue goes up for an item, waste usually increases as well. This helps us identify which products have the most impact on our bottom line.

User Features

- To make the report easy to use, I added **slicers** to filter by month, category, and channel. I also added **navigation buttons** so users can quickly switch between different pages.
-
