Summary

A detail-oriented graduate with a Bachelor's degree (GPA: 3.41) and a strong foundation in Exploratory Data Analysis (EDA) and data-driven problem-solving. I am proficient in the full data lifecycle performing Data Wrangling and preparation using Python (Pandas) and Power Query. developing compelling Data Visualizations with Power BI and Python (Matplotlib) and building predictive models using Machine Learning techniques in Python. My expertise also includes advanced SQL querying (joins, subqueries, unions, CTEs) and applying insights from high-volume retail data to drive tangible operational efficiencies and strategic business outcomes. Eager to apply this unique blend of analytical and practical business sense to an entry-level Data Analyst role.

Education

Universitas Muhammadiyah Tangerang | 2019-2023

Bachelor of Governance Science, Faculty of Social and Political Science |

GPA: 3.41

Professional Experience

Store Associate | Goto Living | August 2024 – October 2025

- Leveraged sales data to identify popular product pairings and customer habits for strategic upselling and cross-selling. Applied data-driven sales techniques to strategically recommend complementary products and increase revenue.

Cashier | Matahari Department Store | March 2022 - April 2024

- Accurately processed an average of 100+ daily transactions across various payment methods, maintaining 100% data integrity under strict financial protocols. Leveraged transaction data and purchasing habits to provide tailored, proactive information on promotions, maximizing customer satisfaction and retention.

Store Associate | Gramedia | December 2018 - December 2020

- Analyzed sales data to identify high-traffic zones and best-selling products, optimizing product displays and contributing to higher revenue. shopping experience and contributed to higher revenue. Applied historical sales data to strategically inform product display and placement, resulting in a 10% increase in sales for key product categories.

Portfolio & Online Presence

GitHub: www.github.com/yusrifargfar

Soft Skills

- **Analytical Skills & Problem-Solving:** Critical Thinking, Problem-Solving, Attention to Detail, Logical Approach
- **Interpersonal & Communication:** Communication, Teamwork, Data Storytelling
- **Personal Attributes:** Adaptability, Time Management

Core Competencies

- **Data Analysis & Machine Learning:** Proficient in the end-to-end data pipeline, including Exploratory Data Analysis (EDA), cleaning, manipulation, and transformation using Python (Pandas) and Power Query. Experienced in preparing and engineering features for machine learning model development with scikit-learn.
- **Data Acquisition & Querying:** Experience in web scraping and extracting data using advanced SQL (joins, subqueries, unions, CTEs).
- **Reporting & Visualization:** Proven ability to create insightful reports and dynamic dashboards using Power BI, Excel, and Python (Matplotlib) to communicate key trends and findings.
- **Problem-Solving:** Strong background in root cause analysis and data-driven decision-making to solve business problems and improve operational efficiency.

Certifications & Specialized Training

Excel Skills for Data Analytics and Visualization (Specialization) | Macquarie University (Coursera)

- Mastered the full data analytics lifecycle in Excel through a 3-course specialization. Proficiently clean, transform, and structure data, create compelling dashboards, and leverage advanced features like Pivot Tables and Power Pivot/Query for data modeling and reporting.

IBM Data Science Professional Certificate | IBM (Coursera)

- Completed **6 out of 12** courses in this specialization, mastering Python fundamentals and key data science libraries.
- **Core Skills Acquired:** Data Analysis with Python (Pandas), Data Visualization with Python (Matplotlib, Seaborn), Databases and SQL, Exploratory Data Analysis and Machine Learning with Python.
- **Completed Course:** Python for Data Science AI & Development, Python Project for Data Science, Databases and SQL for Data Science with Python, Data Analysis with Python, Data Visualization with Python

The Complete SQL Bootcamp: Go from Zero to Hero | Udemy

- Achieved mastery of SQL fundamentals, including Data Manipulation Language (DML) for querying and updating data, and Data Definition Language (DDL) for managing database schemas.
- Gained extensive hands-on experience with advanced querying techniques, including complex joins, subqueries, unions, CTEs, and aggregations.

Project and My Simulation Workflow:

Data Scientist Workflow Project:

Customer Churn Analysis (SQL, Power BI Visualization, Machine Learning Development)
